GRD Simplifying Investments.. Multiplying Money | VS VALUE STOCKS Growth lena hai, Sasta lena hai

VS BLUECHIP EDGE

This is a Multi cap strategy which has quality Large, Mid & Small Cap Stocks from Nifty Total Market 750 index with high Sales & Profit growth and low valuation.

METHODOLOGY

Multi-factor investing is an investment strategy where you build and manage a portfolio based on multiple factors. Instead of relying on just one style—like "value investing" or "growth investing"—you blend several factors to improve diversification and potentially enhance risk-adjusted returns.

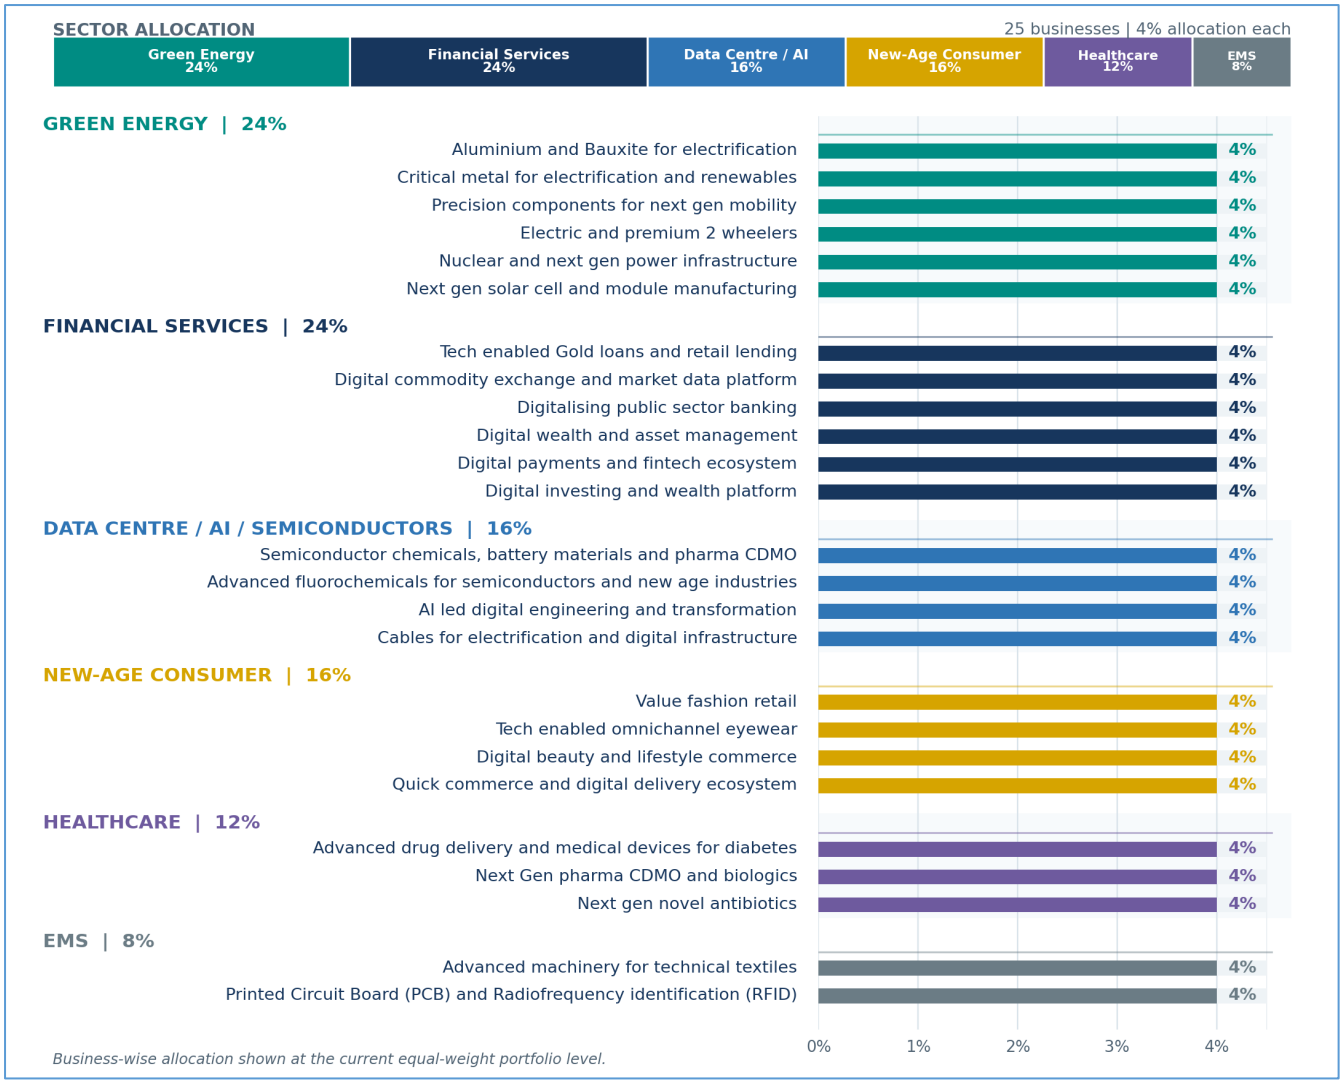

Key Factors Commonly Used

I. Stock Universe: Nifty Total Market (750 Stocks)
II. High Sales Growth (20% minimum) and High Profit Growth (40%)
III. Valuation – Portfolio PEG always maintain less than 1
IV. Risk Mitigation – Low SD and Low Beta stocks
V. Future outlook sectors which are growing

Portfolio Construction: Stocks are screened and ranked according to those factor scores and weighted equally
Diversification: By blending multiple factors, the strategy reduces the risk that any single factor underperforms for too long.

Market Cap Category – **Nifty Total Market 750 stocks**	Average Sales Growth TTM – **41.35**
No. of Sectors & Subgroups – **8 & 20**	Average Profit Growth TTM - **81.62**
